5. **Public Comment**

   There was no public comment.

6. **Epidemiological Presentation**

   The Work Group received a presentation on Epi data relating to HIV and Aging from Maree Kay Parisi, DPH-Epi Section. The group discussed the meaning of the data. CM Jewell noted that the over 50

population mirrors the epidemic as a whole. The group discussed housing for seniors with HIV and requested that Michelle Alcedo gather some information on this to bring back to the Work Group. They also suggested asking Council Member Chris Harris to create a presentation on this issue.

There was no Public Comment on this item.

7. Report back from ACRIA Training

Work Group Member Jesus Guillen shared information from the December ACRIA Training in New York City. He provided the Work Group with brochures that outline the work that has been done already in New York. He noted that San Francisco is a bit behind, but that all they need is for a group to take the initiative and lay the foundation to make changes. He feels that it is important for people to attend the forum on the 25th, and that although this issue will not be easy, it is extremely important. He is glad that he was able to go to New York for this training, and feels that he has learned a lot.

There was no Public Comment on this item.

8. Next Steps for the Committee

The group believes there may be more to discuss after Monday's forum. CS Allgaier noted that they potentially have the power to make a directive to the grantee that asks that they focus on HIV and Aging. He suggested that they find a way to bring this to the Full Council for discussion prior to the August Prioritization and Allocation Summit.

CM Manley suggested looking at senior services and HIV services to see if there is any overlap. CM Jewell noted that in New York, ACRIA created a training program which they then brought to senior service providers.

CS Allgaier noted that he hopes that some preliminary data from the Needs Assessment will be ready by early April.

The mission statement was discussed, and it was noted that the "scope" can just be put in as the mission statement.

The Work Group would also like to discuss the creation of a survey that was suggested at December's meeting.

4. **Announcements**
   - CS Allgaier announced that there was a White House Conference call last Friday that mentioned the need for care for people over 50 living with HIV/AIDS and that he attended a daylong symposium at UCSF for HIV and Aging on May 18.
   - CS Lee announced that he will be dropping 1000 paper cranes as he bikes to Los Angeles on the AIDS Life Cycle.
   - Work Group member Irizarry announced that one of his clients recently died at the age of 70. A moment of silence was observed.

   There was no public comment.

6. **Needs Assessment Presentation**
   Erika Takada and Aimee Crisostomos from Harder and Company presented the Work Group with findings

from their needs assessment focus groups. A copy of the presentation is on file at the Council Support staff office

Some notable findings:

- This is the first time a needs assessment has been conducted for providers.
- Two focus groups were conducted because the first group skewed too much to those aged 50. Another focus group was convened for individuals 60 and over.
- Respondents were interested in seeking care from medical specialists (e.g. vision/hearing, cardiology, etc.) and alternative forms of medicines (herbal, Eastern, etc).
- Harder & Co found that current medical specialists have difficulty in differentiating aging and HIV/AIDS-related problems and found the need to train doctors in geriatric HIV/AIDS.

7. Update on and presentation of online survey results
   CS Allgaier presented the Work Group with results from the online survey. A copy of the presentation is available at the Council Support staff office.

   Some notable findings:

   - CS Allgaier reported that whites were oversampled in the population, while African Americans were under sampled. There was a wide range in incomes.
   - Respondents detailed more of their fears and anxieties as opposed to health care. Some talked about a fear of growing older without a social support network and anxieties about the unknown long term effects of ARVs.
   - The financial impact of HIV and Aging treatment also weighed heavily on some respondents' minds.

8. White Paper Outline and Status Report
   CS Allgaier updated the Work Group on the status of the White Paper, the focus of which is not to make recommendations on primary care and prevention, because these topics will be discussed in the future.

   The White Paper will take a comprehensive look at needs assessment findings and the online survey results. IT will discuss the long term issues of treatment, co-morbidities and the complexity of care. CM Hicks and CM Sharp are currently reviewing this part of the Paper. The Paper will also take a comparative look at other studies going on nationally. CS Allgaier will offer the Committee an opportunity to review the paper before presenting it to the Full Council.

9. Membership Application – VOTE

7. **Review/Approve White Paper – VOTE**
CS Allgaier led the Work Group through an overview of the approval draft of the HIV and Aging White Paper. CS Allgaier quickly went over the eligibility criteria, severe need and special populations definition and how it ties into the White Paper.

- Reviewed the methodology of the paper and the results of Harder & Co Needs Assessment focus groups and online survey.
- Demographic breakdown of respondents – on the whole, target populations were represented. The questions asked were meant to break respondents down into categories according to socioeconomic status, race/ethnicity, gender, level of education, primary source of income, etc.
- The relationship between HIV/AIDS and an overall aging population, which presents problems and obstacles that need to be put into context.
- Older Americans who are forced to leave the city due to rising costs may lose access to support services, social networks and quality health care.
- The report stresses the need for more data, more research.
- The White Paper ends with 10 conclusions and recommendations.

The Work Group then possible recommendations and discussed changes to the approval draft:

- There is recognition of the importance of housing, but there are no concrete recommendations for ensuring affordable housing.
- Some Work Group members displayed some concern about the paper's cost neutral position. Some want to push for the money, while others want to ensure that the paper will be heard through the proper channels and appropriate authorities.

Co-Chair Steinhart likened the HIV and Aging problem as a tidal wave of sorts, similar to what has happened at the beginning of the HIV/AIDS epidemic. What are we going to do when people living with HIV age. This moment gives us pause, we don't know, we cannot conceive how to tackle a problem that is only beginning to emerge.

A copy of the draft is available at the Council Support Staff office.
